Spotify Clone using React.Js:
https://spotify-clone-98395.web.app/

SKILLS

Python.
Mainly I use python to solve programming questions data structure problems. Also small automation and testing, design desktop apps.

Flutter:
To make Android and IOS apps.

React.js:
Whenever I need to make web applications, then I use React.js.

Firebase:
Managing database., Hosting website and whenever I need backend connection like OTP verification, google auth another social login, I use Firebase.

Data Structure And Algorithm.
This subject is the most favorite of all. I learned sorting, searching, Array, Linked list, Stack, Queue, Tree, Graph. How to solve a problem with different approaches and algorithms. Design flowchart and a lot.

INTERNSHIP

WEB DEVELOPER REACT.JS
Accomnow | Kolkata | Dec 2020 - Jan 2021

I was working as a full-stack developer. My daily task was there, make reusable React components [whenever we need those components, we simply import them and use them in existing projects] and backend Firebase connection.

FLUTTER DEVELOPER
ZinfyTech | Kolkata | Aug 2021 - Oct 2021

I use to work there as a Flutter dev. My main task was there develop UI using Flutter, connect the backend with Firebase but apart from
that, I designed app flow and pages and also I did some app testing. In one quota I learned a lot of new things at zinfytech.

PROJECTS

FLASH CHAT [FLUTTER APP] Flutter, Firebase, Material UI, Android Studi

Flutter real-time chat app which can run android and ios both platforms. Backend connected with firebase cloud frestore and login signup using firebase authentication. Multiple users can chat with each other.
other. [GitHub code link -> https://github.com/ra299/Flash_chat_Flutter]

Weather App [Flutter App] Flutter, Open Weather API, Android Studio.
Posted link -
https://www.linkedin.com/feed/update/urn:li:activity:6776020957464293376/

A weather app. Using this find out the live weather data in the current location of the device as well as the weather for any city you can think of! [GitHub code link -> https://github.com/ra299/Weather_App_Flutter]

Spotify Clone [Reac.js Web Site] React.js , Spotify Web API, React Context API, HTML, CSS.

Spotify login with home page connected with real-time Spotify user data using react and Spotify Web API. [Github code -> https://github.com/ra299/spotify_clone_react]

Netflix Clone [React.js Web Site] React.js, TMDB API, HTML, CSS

.Netflix home page design by React and also live Netflix data in the backend like movies, banners, trailers. from TMD API. [Github code -> https://github.com/ra299/Netflix__clone_react]

COURSES

Flutter Development	**Udemy Dec 27, 2020**
120 hours Flutter Development.	
Full Stack Web Development	**Udemy Oct 8, 2020**
I did 54 hours of web development course from	
AWS Certified Solutions Architect Associate	**Udemy June 18, 2021**
It was an 18 hr online course. Here I learned IAM, S3, EC2, Database on AWS, Route 53, VPC, HAArchitecture.
